Using this value and the pH equation, we can calculate the pH. Now we can find the pOH. The sum of the pH and the pOH is always 14. The pOH of the solution is 7.8. Alternatively, a shortcut can be used to estimate the pH. If is in the form , then pH is roughly .

Chemists combine all of the relationships seen in Models 1 and 2 into one law—the Ideal Gas Law. It is one equation that describes gas behavior and the relationship among all four variables, P, V, T, and n. In the Ideal Gas Law the proportionality constant is represented by the letter R (rather than the generic k).
