This tutorial aims at providing guidelines and practical tools to assist with the analysis of hyperspectral images. Topics like hyperspectral image acquisition, image pre-processing, multivariate exploratory analysis, hyperspectral image resolution, classification and final digital image processing will be exposed, and some guidelines given and discussed.

Hyperspectral image analysis. A tutorial - ScienceDirect

Hyperspectral imaging (HSI) is a spectral imaging acquisition where each pixel of the image was employed to acquire a set of images within certain spectral bands. Such a set of images carries information pro pixel close to those collected by DRS method in scanning mode, for instance, dimensional maps of hemoglobin oxygen saturation (SO₂) or total hemoglobin concentration.
