The PhET Fission simulation does an excellent job of showing the process of fission, what is produced from fission and how a chain reaction occurs. By modeling fission, students gain a clear picture of the difference between fission and nuclear decay that was learned in the previous 2 lessons.

Detail Page. PhET Simulation: Nuclear Fission. published by the PhET. supported by the National Science Foundation. This resource simulates a nuclear chain reaction, as users fire a neutron gun to induce fission in a radioactive isotope. It initiates with a single Uranium-235 nucleus alongside a graph displaying potential energy.
